

Course: IT202-008-S2025

Assignment: IT202 Module 3 HTML, CSS, JS Challenges

Student: Carl E. (cle3)

Status: Submitted | Worksheet Progress: 111.11%

Potential Grade: 11.00/10.00 (110.00%)

Received Grade: 0.00/10.00 (0.00%)

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-008-S2025/it202-module-3-html-css-js-challenges/grading/cle3>

# Instructions

1. Ensure you read all instructions and objectives before starting.
2. Create a new branch from dev called M3-Homework
  1. `git checkout dev` (ensure proper starting branch)
  2. `git pull origin dev` (ensure history is up to date)
  3. `git checkout -b M3-Homework` (create and switch to branch)
3. Copy the template code from here: [GitHub Repository - M3 Homework](#)
  - It includes Challenges 1-3 and `styles.css`. Put all into an `M3` folder or similar inside your `public_html`
  - Immediately record to history
    - ☐ `git add public_html`
    - ☐ `git commit -m "adding M3 HW baseline files"`
    - ☐ `git push origin M3-Homework`
    - ☐ Create a Pull Request from M3-Homework to dev and keep it open
4. Fill out the below worksheet
  - Each Problem requires the following as you work
    - ☐ Ensure there's a comment with your UCID, date, and brief summary of how the problem was solved
    - ☐ Update ucid in header tag
    - ☐ Code solution (add/commit periodically as needed) (style and/or script tags)
5. Once finished, click "Submit and Export"
6. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
  1. `git add .`
  2. `git commit -m "adding PDF"`
  3. `git push origin M3-Homework`
  4. On Github merge the pull request from M3-Homework to dev
  5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the heroku prod links work)
7. Upload the same PDF to Canvas
8. Sync Local
  1. `git checkout dev`
  2. `git pull origin dev`

# Section #1: ( 3 pts.) Challenge 1 - Fixed Header, Content, Footer

## Task #1 ( 3 pts.) - Edit the `style` and `script` tags to solve the challenge

### Combo Task:

**Weight:** 100%

**Objective:** Edit the `style` and `script` tags to solve the challenge requirements

**Details:**

- Only make edits where noted via provided comments
- Update your ucid in the header tag
- Challenge 1: The header and footer should remain FIXED in place (top and bottom of page respectively)
- Challenge 2: The content area should SCROLL independently (nothing should be pushed off screen)
- Challenge 3: The entire page should always take up the full viewport height
- Add code to solve the problem (add/commit as needed)

### Item:#1

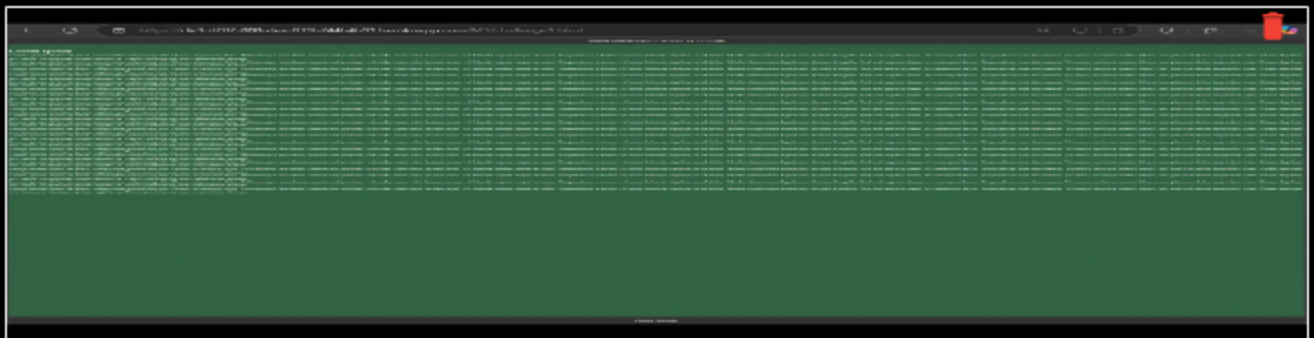

**Weight:** 40%

**Details:**

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)
  1. Ensure url is visible in the browser's address bar

### ≡ Image Prompt

## Heroku Screen Shot challenge 1

```
60 body: flex: 1;
61 margin: 0;
62 padding: 0;
63 flex-direction: column;
64
65 header: {
66   flex: 0 0 100px;
67   margin: 0;
68   padding: 0;
69   border-bottom: 1px solid black;
70   display: flex;
71   justify-content: space-between;
72   align-items: center;
73 }
74
75 footer: {
76   flex: 0 0 100px;
77   margin: 0;
78   padding: 0;
79   border-top: 1px solid black;
80   display: flex;
81   justify-content: space-between;
82   align-items: center;
83 }
84
85 main: {
86   flex: 1;
87   margin: 0;
88   padding: 0;
89   display: flex;
90   flex-direction: column;
91   align-items: center;
92 }

## VsCode solutions

```
1. I need to make sure the header stays fixed at the top.
2. The footer needs to stay at the bottom.
3. The content area needs to scroll independently.
4. I need to change the formatting to ensure the header stays at the top and the footer at the bottom.
5. I can probably find a command that allows the content area to scroll independently.
```

### Item:#3

**Weight:** 40%

**Details:**

Briefly explain **how** the code solves the challenge(s) (note: this isn't the same as **what** the code does)

#### ≡ Text Prompt

Your Response:

The code solves it by changing the content format so that everything on the content is displayed, it also anchors the heading and footer to stay fixed, which stops it from moving. By doing this it solves the questions that were asked.

Saved: 2/24/2025 11:34:04 PM

## Section #2: ( 3 pts.) Challenge 2 - Header, Content, And Sidebars

Task #1 ( 3 pts.) - Edit the `style` and `script` tags to solve the challenge

### Combo Task:

**Weight:** 100%

**Objective:** Edit the `style` and `script` tags to solve the challenge requirements

**Details:**

- Only make edits where noted via provided comments
- Update your ucid in the header tag
- Using CSS, adjust the layout per the following
  - Challenge 1: Header is at the top
  - Challenge 2: Content takes up the rest of the height

- Challenge 2: Content takes up the rest of the height
- Challenge 3: Both sidebars docked to the respective side and take up 15% width; Content area should utilize the remaining width
- Using JavaScript complete the following
  - Challenge 4: Attach the appropriate event listener to the buttons
  - Challenge 5: Individual toggle the respective panel between collapsed and uncollapsed (Don't lose the button in the process)
  - Challenge 6: The content should adjust based on the status of the respective sidebars (i.e., take up more left, right, or both space)
- Add code to solve the problem (add/commit as needed)

## Item:#1

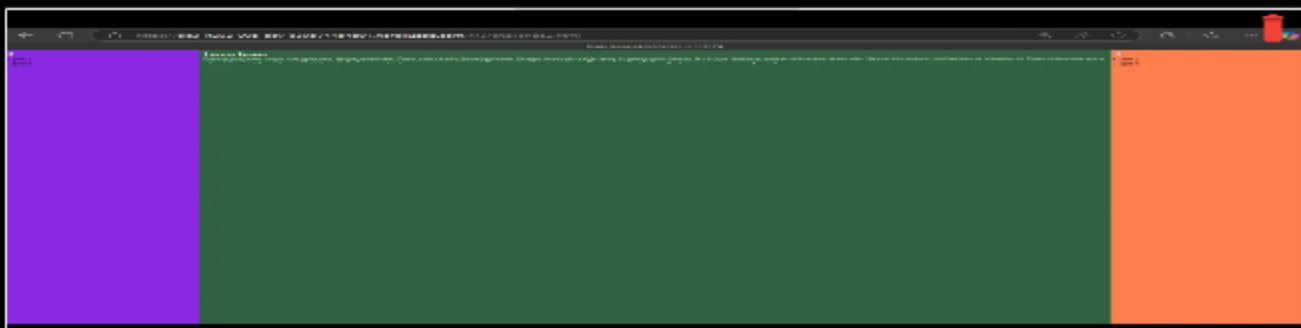

Weight: 40%

Details:

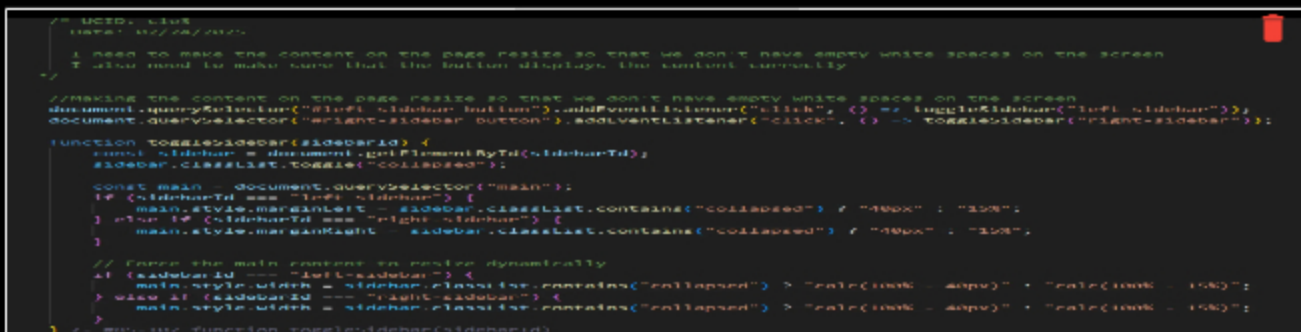

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
  2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)
1. Ensure url is visible in the browser's address bar

## Image Prompt

Showing Heroku dev solutions

Showing code

```
const container = document.querySelector('div.container');
const header = document.querySelector('div.header');
const main = document.querySelector('div.main');
const footer = document.querySelector('div.footer');

// Set initial height for container
container.style.height = '100vh';

// Set initial height for header
header.style.height = '50px';

// Set initial height for main
main.style.height = '40px';

// Set initial height for footer
footer.style.height = '50px';
```

## Item:#3

Weight: 40%

Details:

Briefly explain **how** the code solves the challenge(s) (note: this isn't the same as **what** the code does)

### Text Prompt

Your Response:

By using CSS the code positioned the header at the top, ensuring that the content takes up the remaining space and didn't leave anything blank. Adding JavaScript to toggle sidebar

remaining class and didn't leave anything blank. Adding save script to toggle class to collapse/expand with buttons to allow resizing.

## Section #3: ( 3 pts.) Challenge 3 - Carousel Layout With Swiping

Task #1 ( 3 pts.) - Edit the `style` and `script` tags to solve the challenge

### Combo Task:

**Weight:** 100%

**Objective:** Edit the `style` and `script` tags to solve the challenge requirements

**Details:**

- Only make edits where noted via provided comments
- Update your ucid in the header tag
- Using CSS, adjust the layout per the following
  - Challenge 1: Header is at the top
  - Challenge 2: Carousel should take up full width
  - Challenge 3: Buttons should be centered
- Using JavaScript complete the following
  - Challenge 4: Attach appropriate event listeners to each button
  - Challenge 5: Cycle through each panel showing only 1 at a time
  - Challenge 6: Ensure that the panels loop when reaching the last or first one
- Add code to solve the problem (add/commit as needed)

### Item:#1

**Weight:** 40%

**Details:**

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

1. Ensure url is visible in the browser's address bar

## VsCode code solutions

 Saved: 2/24/2025 11:44:52 PM

## Item:#2

**Weight: 20%**

**Details:**

- Direct link to the file in the homework related branch from Github (should end in `.html`)
- Direct link to the file on Heroku Prod (Just grab the base prod url and manually enter the path to the file)

## Url Prompt

URL #1 <a href="https://cle3-it202-008-prod-58562394d633.herokuapp.com/M2/challenge3.html">https://cle3-it202-008-prod-58562394d633.herokuapp.com/M2/challenge3.html</a>		URL <a href="https://cle3-it202-008-prod-58562394d633.herokuapp.com/M2/challenge3.html">https://cle3-it202-008-prod-58562394d633.herokuapp.com/M2/challenge3.html</a>

### Item:#3

**Weight:** 40%

**Details:**

Briefly explain **how** the code solves the challenge(s) (note: this isn't the same as **what** the code does)

#### ≡ Text Prompt

Your Response:

The code solves the challenge by positioning the header at the top, making the carousel full width, centering the buttons, cycling through panels with button clicks, looping panels when reaching the end, and I attempted to add mouse swiping for the extra credit. Overall the code answers all the challenge questions.

## Task #2 ( + 0.98 pts.) - Extra Credit - Challenge 7

### Combo Task:

**Weight:** 32.5%

**Objective:** Extra Credit - Challenge 7

### Item:#1

**Weight:** 50%

**Details:**

1. Snippet of relevant code showing solution (with ucid/date comment)

#### ≡ Image Prompt

```
//Attempting Extra Credit
```

```
let isDragging = false;
let startX;
```

```
carouselContainer.addEventListener("mousedown", (e) => {
  isDragging = true;
  startX = e.clientX;
});
```

Extra credit attempt

### Item:#3

**Weight:** 50%

**Details:**

Briefly explain **how** the code solves the challenge(s) (note: this isn't the same as **what** the code does)

#### ≡ Text Prompt

Your Response:

The code detects if a mouse is being dragged based on positioning and if so it changes the carosuel.

## Section #4: ( 1 pt.) Misc

### Task #1 ( 0.33 pts.) - Github Details

#### Combo Task:

**Weight:** 33.33%

**Objective:** Github Details

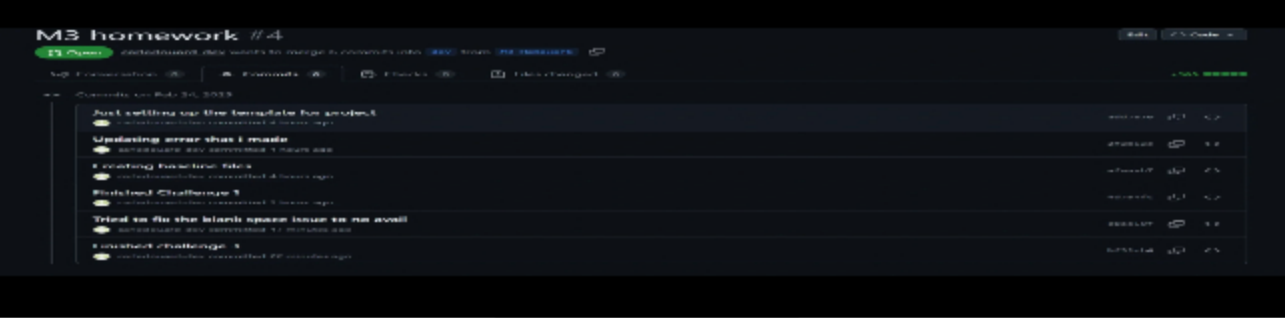

## Item:#1

Weight: 60%

### Details:

From the Commits tab of the Pull Request screenshot the commit history

## ≡ Image Prompt

The screenshot shows a GitHub Pull Request titled "M3 homework #4" by user "carledouard-dev". The commit history tab is selected, showing a list of commits. The commits are as follows:

Commit Message	Author	Date
Just setting up the template for project	carledouard-dev	1 hour ago
Updating error that I made	carledouard-dev	1 hour ago
Creating baseline files	carledouard-dev	1 hour ago
Finished Challenge 1	carledouard-dev	1 hour ago
Tested on the black space issue as no avail	carledouard-dev	1 hour ago
Finished challenge 1	carledouard-dev	1 hour ago

A yellow dashed arrow points to the "Commits history" label below the screenshot.

## Task #3 ( 0.00 / 0.33 pts.) - Reflection

Sub-Tasks:

Task #1 ( 0.00 / 0.33 pts.) - What did you learn?

**Weight:** 33.33%

**Objective:** *What did you learn?*

**Details:**

Briefly answer the question (at least a few decent sentences)

### ≡ Text Prompt

Your Response:

I learned how to code in CSS and how to use Javascript when building a website. It was a really informing homework, I have never used CSS before so I am happy to say I have a new skillset.

Saved: 2/24/2025 11:50:10 PM

## Task #2 ( 0.00 / 0.33 pts.) - What was the easiest part of the a

**Weight:** 33.33%

**Objective:** *What was the easiest part of the assignment?*

**Details:**

Briefly answer the question (at least a few decent sentences)

### ≡ Text Prompt

Your Response:

Easiest part was definetly the scroll bar and the header/footer. It was easy to understand and I was able to completely finish that one.

Saved: 2/24/2025 11:50:29 PM

## Task #3 ( 0.00 / 0.33 pts.) - What was the hardest part of the a

**Weight:** 33.33%

**Objective:** *What was the hardest part of the assignment?*

**Details:**

Briefly answer the question (at least a few decent sentences)

## ≡ Text Prompt

Your Response:

The extra credit, and removing completely the white spaces. I don't know how to make the system register the mouse entirely.
