Instructions

1. Ensure you've followed the lessons to set up your Github, git, and VS Code
2. Fill in the below tasks (note it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to Github in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

≡, Text Prompt

Your Response:

Yes, I had a few issues, seeing as I have never used VSCode before everything was brand new to me. I have also never used git or GitHub (outside of references for code). It's like learning a new language, I am both excited and a bit intimidated but overall happy and ready to learn. Yes, I learned what VSCode is, I learned a lot about git and the commands you can use. I learned why it's important to have experience in Git as well as the free resource W3schools that I can use to study.
